9 Study Help

You can use a **four square** to organize information about a topic. Each of the four squares can be a category, such as *definition*, *vocabulary*, *example*, *non-example*, *words*, *algebra*, *table*, *numbers*, *visual*, *graph*, or *equation*. Here is an example of a four square for a function.

On Your Own

Make a four square to help you study these topics.

- 1. function
- 2. mapping diagram
- **3.** input-output table

After you complete this chapter, make four squares for the following topics.

- **4.** graph of a function
- **5.** linear function
- **6.** Choose two other topics that you studied earlier in this course. Make a four square for each topic.

"I'm taking a survey for my four square. How many fleas do you have?"
