

BIG IDEAS GAME CLOSET

How Close Can You Get?

Materials: Ruler or Tape Measure, pencil and paper

Directions: Use either English or Metric units.

Work in a group of 2-4 students.

Students select 9 items from the classroom:

1. Book
2. White board
3. Shelves
4. Door, etc.

Each student estimates the measurement of the distance or dimensions of the object. Then the students find the exact measurement, Students then find the difference between the estimate and actual measurements.

Who Wins? For each item the student(s) with the smaller difference wins a point. Student with the most points wins the round.

Object	Estimate	Actual Measurement	Difference	Point
