

# BIG IDEAS GAME CLOSET

## Amazing Decimals

**Materials:** Pencil, paper, game board below

**Directions:** Work with a partner. Each partner has his /her own game board. Each student uses his/her own board and finds all possible products, like the one shown. List all the products found.

**Who Wins?** After a set amount of time, the student with the most products wins.

**Variation:** Have students use the blank maze to make up their own. This can be used with addition, multiplication, subtraction, or division for any type of numbers: decimals, fractions, whole number, positive or negative, etc.
