

# Mean

Name \_\_\_\_\_

## Key Concept and Vocabulary

Add the weights and divide.

Sum of 5 apple weights

$$2.45 \div 5 = 0.49 \text{ lb}$$

Number of apples

Mean weight

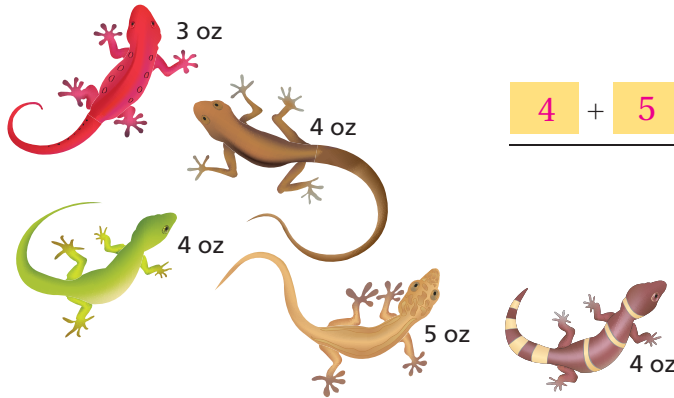

Divide by the number of apples.

## PRACTICE MAKES PURR-FECT™

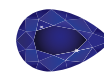

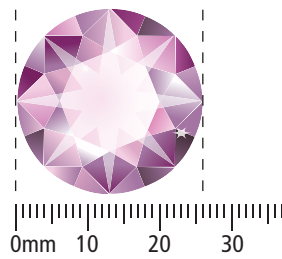

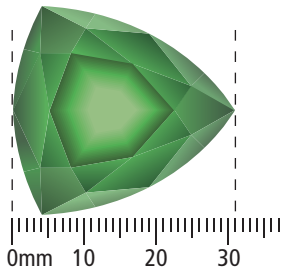

Check your answers at [BigIdeasMath.com](http://BigIdeasMath.com).

1. **LIZARD WEIGHT** Find the mean weight of the lizards. Include the units in your answer.

$$\frac{4 + 5 + 3 + 4 + 4}{5} = 4 \text{ oz}$$

2. **GEM WIDTH** Find the mean width of the gemstones. Include the units in your answer.

$$\frac{31 + 26 + 35 + 28}{4} = 30 \text{ mm}$$
