

Comparing Rates

Name _____

Key Concept and Vocabulary

Motorcyclist

Compare the numerators if you have a common denominator.

60 is less than 80.

$$\frac{60 \text{ miles}}{1 \text{ hour}} < \frac{80 \text{ miles}}{1 \text{ hour}}$$

So, the speed of the motorcyclist is faster.

Because < is used, the second rate is faster than the first rate.
