

8 Inequalities

8.1 Writing and Graphing Inequalities

8.2 Solving Inequalities Using Addition or Subtraction

8.3 Solving Inequalities Using Multiplication or Division

8.4 Solving Two-Step Inequalities

"If you reached into your water bowl and found more than \$20..."

"And then reached into your cat food bowl and found more than \$40..."

"What would you have?"

"Dear Precious Pet World: Your ad says 'Up to 75% off on selected items'."

"I select Yummy Tummy Bacon-Flavored Dog Biscuits."

What You Learned Before

Ordering Fractions

Example 1 Use a number line to order $\frac{3}{2}$, $\frac{3}{4}$, 0 , $1\frac{2}{3}$, and $\frac{1}{6}$ from least to greatest.

Write each of the numbers using a common denominator.

Try It Yourself

Use a number line to order the numbers from least to greatest.

1. $1, \frac{3}{5}, \frac{3}{20}, \frac{3}{4}, \frac{7}{10}$

2. $\frac{1}{4}, \frac{13}{12}, \frac{5}{6}, \frac{5}{12}, \frac{1}{2}$

Comparing Numbers

Complete the number sentence with $<$, $>$, or $=$.

Example 2 $10 \square 15$

On a number line, 10 is closer to zero than 15.

∴ So, $10 < 15$.

Example 3 $0.875 \square \frac{7}{8}$

$$0.875 = \frac{875}{1000} = \frac{875 \div 125}{1000 \div 125} = \frac{7}{8}$$

∴ So, $0.875 = \frac{7}{8}$.

Example 4 Find three numbers that make the number sentence $1\frac{2}{5} \leq \square$ true.

∴ Sample answer: $1\frac{3}{5}, \frac{5}{2}, 2$

Try It Yourself

Complete the number sentence with $<$, $>$, or $=$.

3. $2.01 \square 2.001$

4. $4.5 \square \frac{9}{2}$

5. $\pi \square 3.2$

Find three numbers that make the number sentence true.

6. $\frac{17}{2} \leq \square$

7. $1\frac{1}{2} > \square$

8. $0.75 \geq \square$
