

# 4 Study Help

You can use a **summary triangle** to explain a concept. Here is an example of a summary triangle for finding a percent of a number.

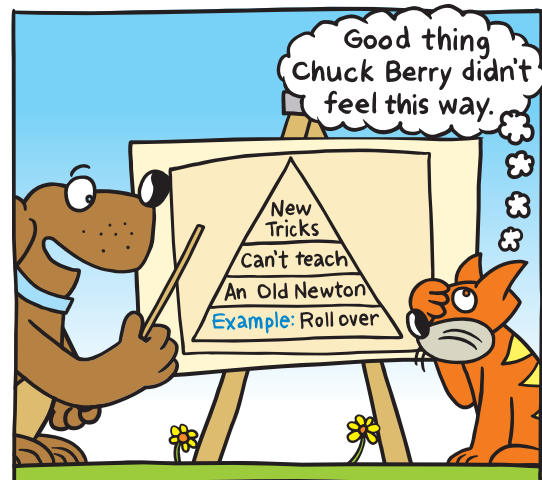

## On Your Own

Make a summary triangle to help you study these topics.

1. finding the percent given a number and a part of the number
2. finding the number given a part of the number and a percent
3. percent of increase
4. percent of decrease

After you complete this chapter, make summary triangles for the following topics.

5. discount
6. markup
7. simple interest

"I hope my owner sees my **summary triangle**. I just can't seem to learn 'roll over'."
