

7 Data Analysis and Displays

- 7.1 Measures of Central Tendency
- 7.2 Box-and-Whisker Plots
- 7.3 Scatter Plots and Lines of Best Fit
- 7.4 Choosing a Data Display

What You Learned Before

● Displaying Data

Example 1 The table shows the results of a survey. Display the data in a circle graph.

Class Trip Location	Water park	Museum	Zoo	Other
Students	25	11	5	4

A total of 45 students took the survey.

Water park:

$$\frac{25}{45} \cdot 360^\circ = 200^\circ$$

Museum:

$$\frac{11}{45} \cdot 360^\circ = 88^\circ$$

Zoo:

$$\frac{5}{45} \cdot 360^\circ = 40^\circ$$

Other:

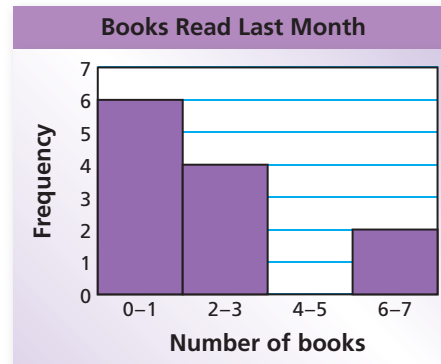

$$\frac{4}{45} \cdot 360^\circ = 32^\circ$$

Class Trip Locations

Example 2 The frequency table shows the number of books that 12 people read last month. Display the data in a histogram.

Books Read Last Month	Frequency
0-1	6
2-3	4
4-5	0
6-7	2

Try It Yourself

1. Conduct a survey to determine the after-school activities of students in your class. Display the results in a circle graph.
2. Conduct a survey to determine the number of pets owned by students in your class. Display the results in a histogram.
