

Big Ideas Math®

## Let's Race!

► **Materials:**

- 1 number cube
- 1 pathway per group
- 2 chips

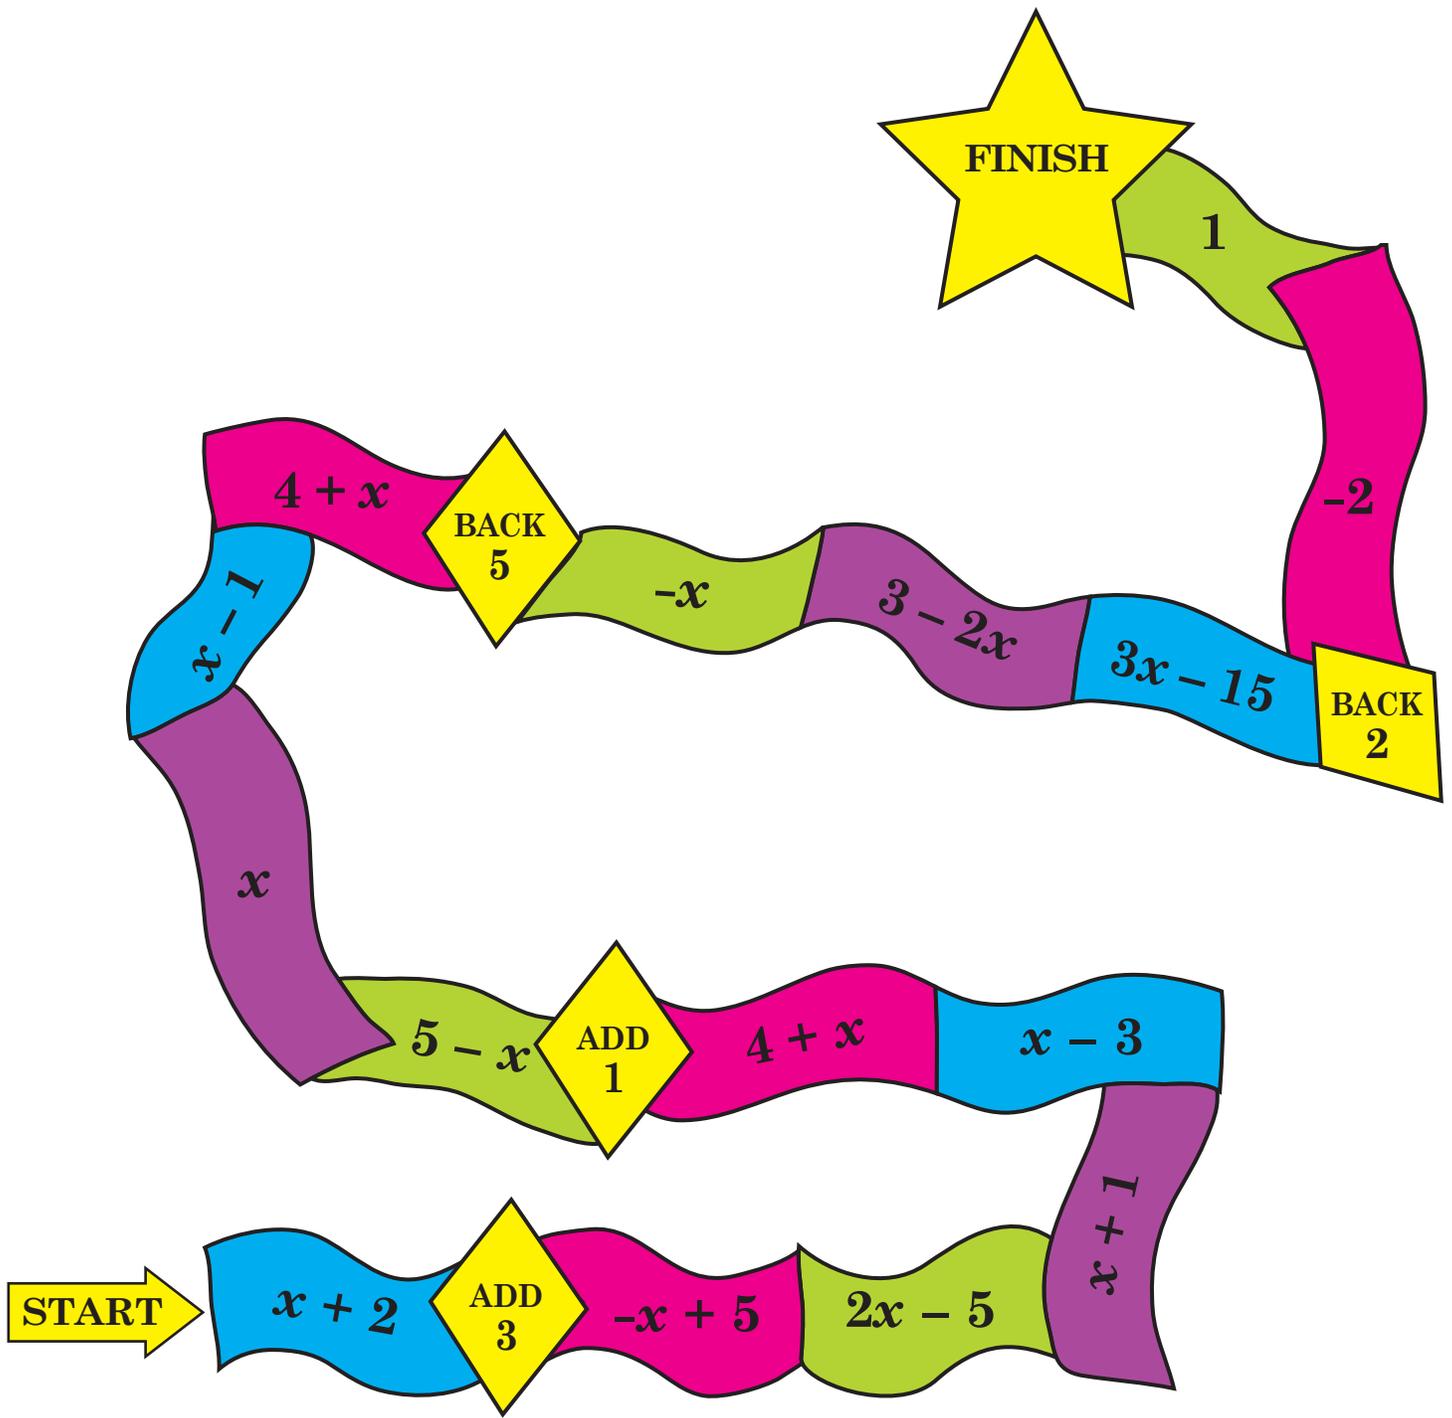

► **Directions:**

Students play in pairs.

1. Players take turns rolling the number cube and substituting the rolled number for  $x$  in the expression.
2. Players evaluate the expression and use that number to move their chip along the pathway. A positive answer results in a move forward and a negative answer results in a move backward.

► **Who Wins?**

The player that reaches the FINISH first wins.

Chips:
