

## Big Ideas Math®

# Rectangle Game

### ► Materials:

- Pencil
- Paper
- Chapter Review exercises
- Game board
- Score chart

### ► Directions:

This game is for two players.

The rectangular array is the playing board. Students take turns connecting two points of a rectangle in a horizontal or vertical manner. If a student draws the last side of a rectangle, he or she places their initials in the rectangle and receives 2 points. If the rectangle is completed around a number, the player also completes that exercise in the Chapter Review exercises. If the teacher confirms that the answer is correct, the player receives 10 points. If the answer is incorrect, then the other player receives 10 points.

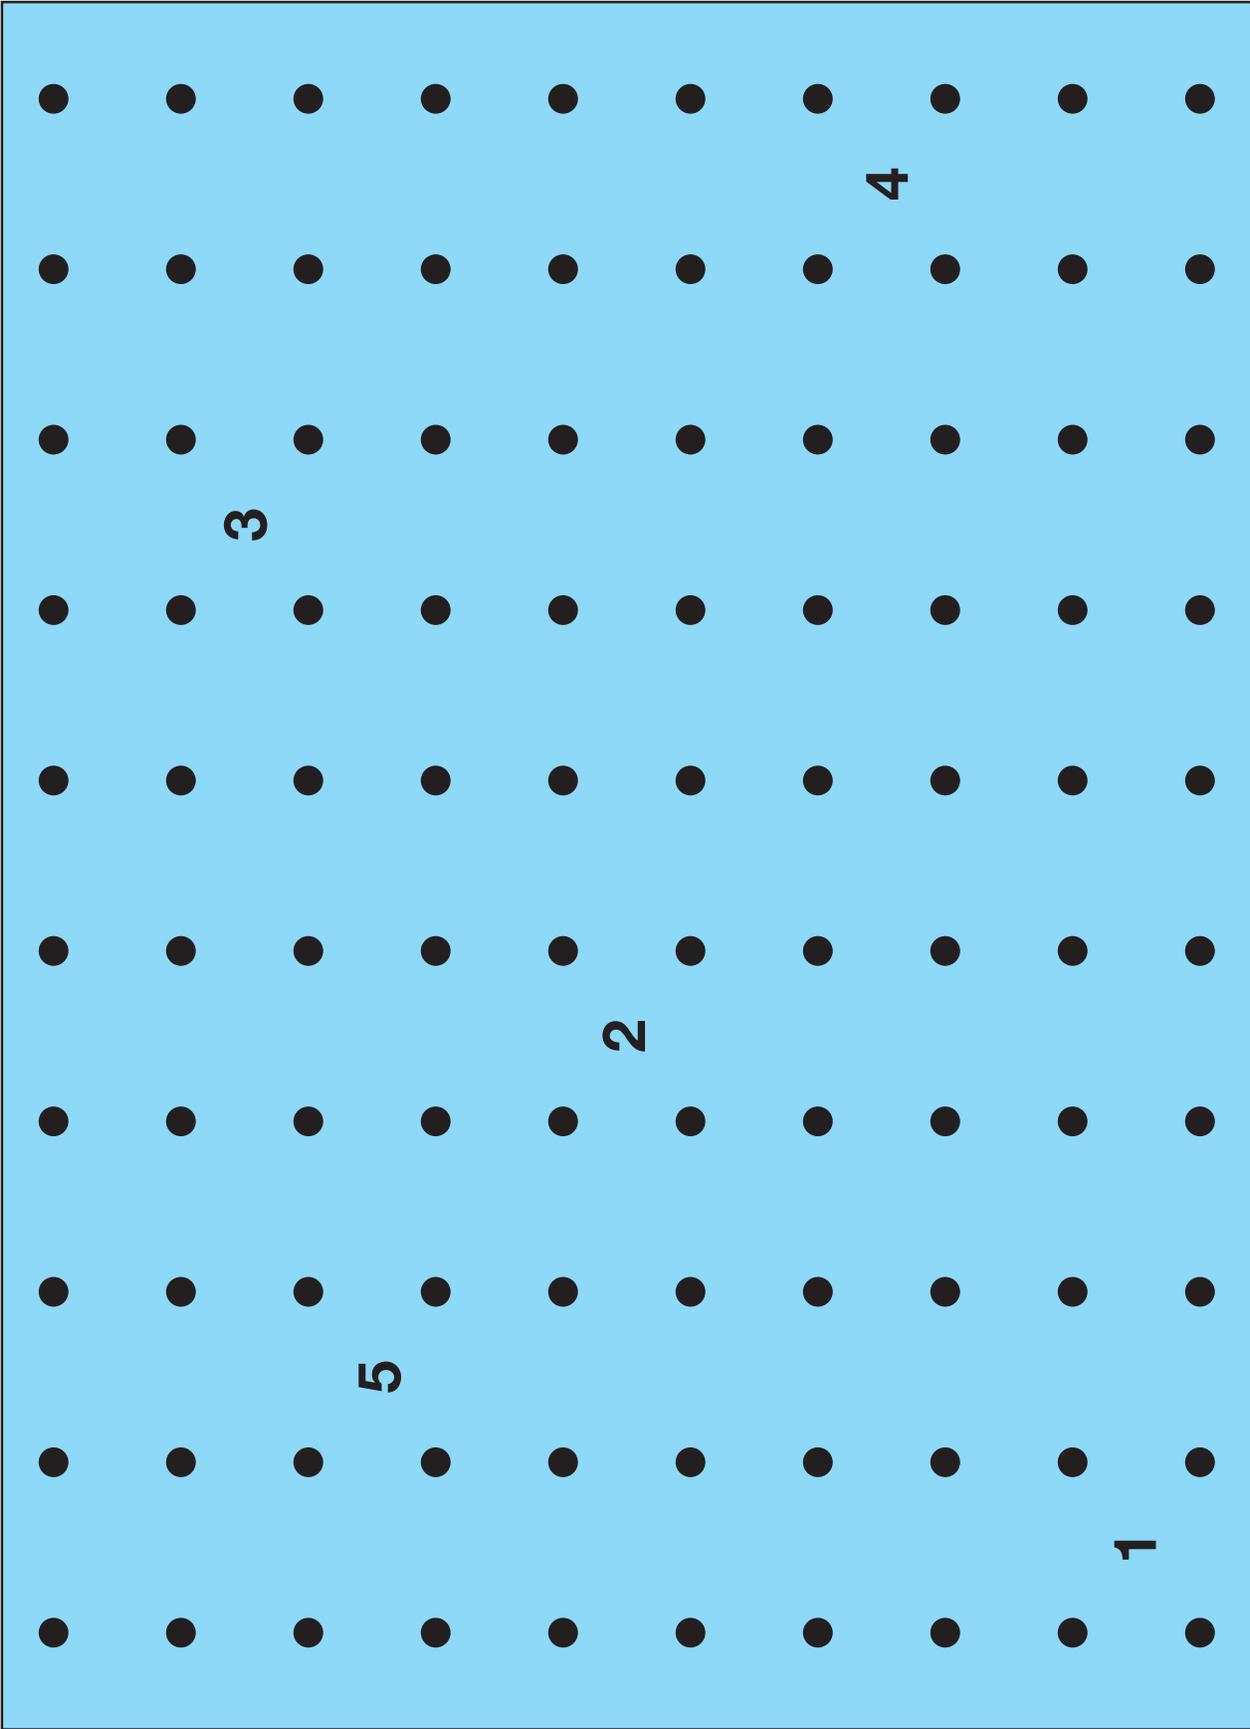

All points can be recorded in the score chart. The player who completes a rectangle also wins another turn.

### ► Who Wins?

The student with the most points when time is called by the teacher wins.

Game Board:

**Note:** Numbers will have to be added to the playing board, depending on the length of the Chapter Review that is being used.
