

# Big Ideas Math® Game Closet

## Pick Your Fractions

### ● Materials:

- Operation spinner
- Fraction game board
- Pencil
- Paper

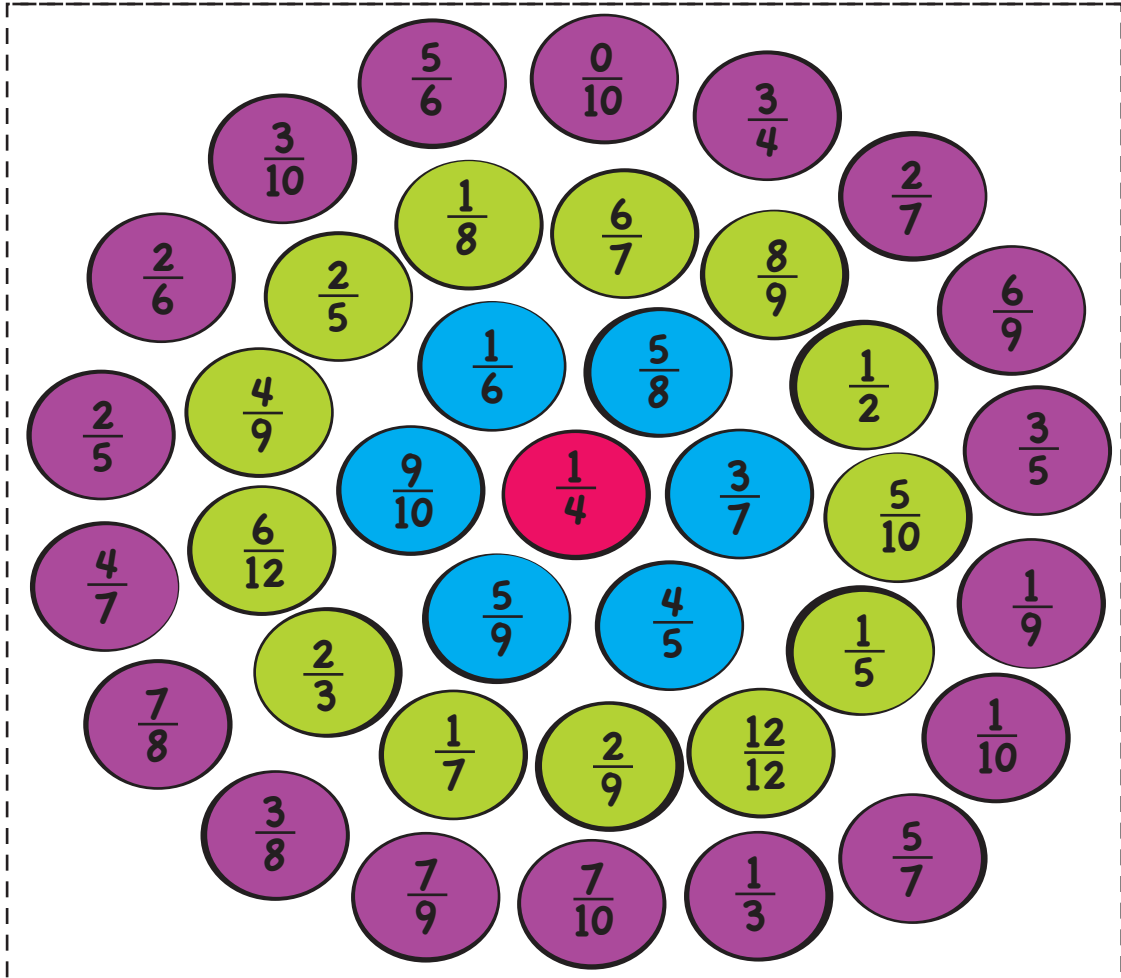

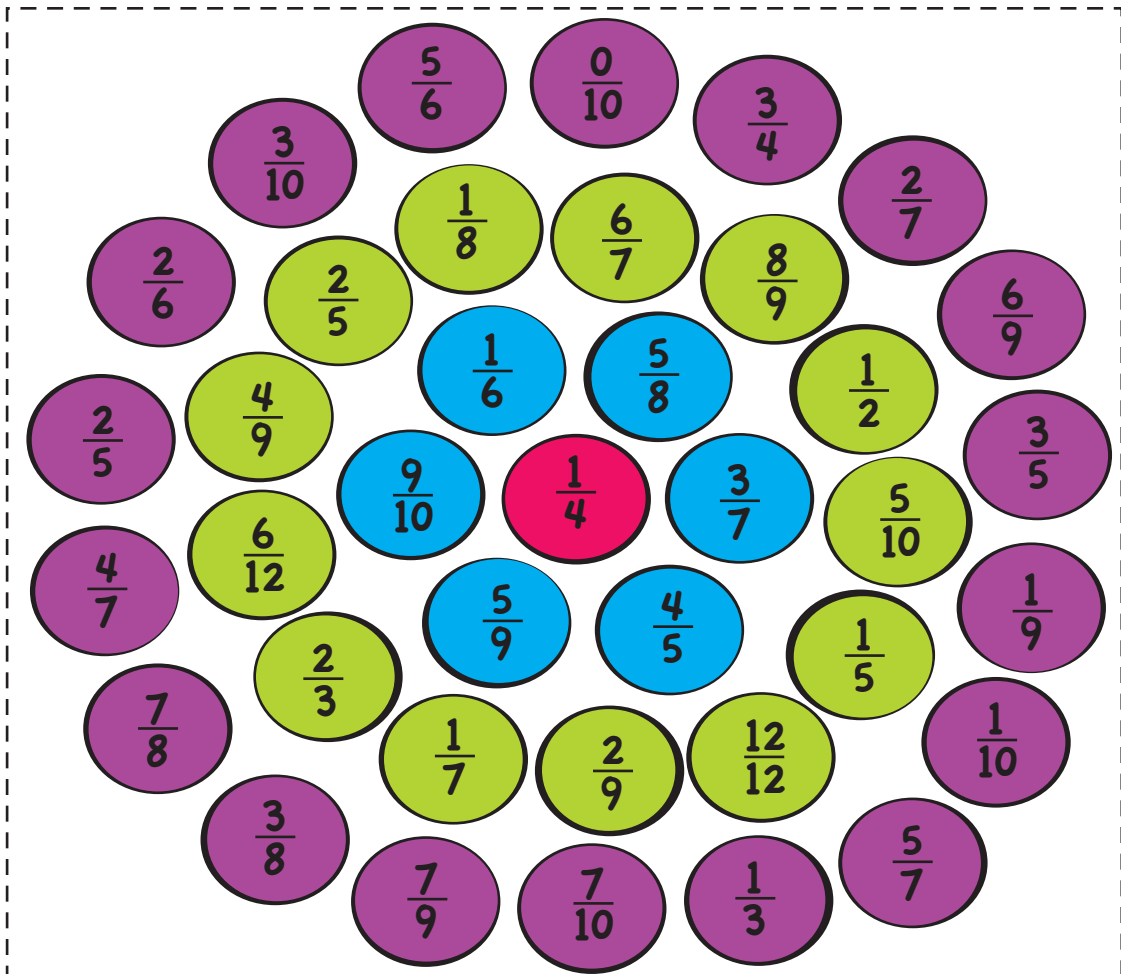

### ● Directions:

Students play in pairs. One student spins the operation spinner, selects two fractions of different colors, and performs the operation to determine their score. The partner checks the work. Then the roles are reversed. With each turn, each student keeps a running total of their score. Each fraction can be used only once. Play continues until all of the fractions are used or until there are no different colors left.

### ● Who Wins?

The winner is the student with the highest total when play ends.

For best results, use a hole punch to make a hole in the center of the spinner before inserting a .5" brass fastener.
